

LOST FORREST

This program will fit into an unexpanded VZ-200 but only just and spaces should be missed out where they are not necessary.

The Player can move from one location to another by using the commands:

N - NORTH
S - SOUTH
W - WEST
E - EAST

The command 'HELP' will display a list of verbs (or words) that the computer understands.

These words will aid the player in his search for the missing 'Green God' and several other treasures.

When the player thinks he has all of the missing treasures he should return to the location of the 'large trees' and type the command 'SCORE'. If all the treasures have been found then a winning message will be displayed.
